VIEW RTT DETAILS

There is only an **RTT Pathway** if we are monitoring a **Referral to Treatment** (**RTT**) period. If a referral is not subject to RTT rules, or treatment has already been given, there is no Pathway.

RTT Details can be seen in many places, for example:

In the **Outpatient Referral** screen and **RTT Details** tab – only if an RTT Pathway exists:

ROBINSON, David (Mr), 22-Jun-1964, H110000327 -

When creating or updating any activity linked to an RTT Pathway, you will be presented with a list of relevant RTT Status codes to update the Pathway. This is covered in the relevant reference guides.

Maintain Patient Pathways - RTT PATHWAYS SCREEN

This screen shows all RTT Pathways for the patient. There are certain corrections to the RTT Pathway that must be done in this screen. Please see the separate reference guides.

Note: Access to this functionality is restricted

Select the **RTT Pathways Navigation** bar and **Maintain Patient Pathways**	The **Patient RTT Pathways** screen displays
Search for the patient See the **MPI > Search for a Patient guide** for details	The patient's pathways display

Top-half of the screen:

The top section of the screen lists the patient's pathways. Click on the pathway to see the details of the highlighted pathway in the bottom section of the screen

You can see if the pathway is **active** or not.

> **Inactive** pathways are closed and have no clock running.

> **Active** pathways may have a clock running, or this may have stopped for a period of active monitoring

You can right-click on a Pathway to jump to the patient's Outpatient Referrals (View Patient Appointments) and Inpatient/DayCase Waiting List entries (View Entries by Patient). Pressing the ESC key from these screens returns you to this RTT Pathways screen.

Bottom-half of the screen:
The bottom section of the screen shows the details of the RTT Pathway highlighted in the top section. The details are split into different tabs:

Pathway Details

| RTT Details | Pause Periods | Episodes | Comments | Breach Reasons |

[Cancel]   [Save]

The **Original Start Date** and the **Latest Start Date** may be different if the clock has stopped and a subsequent RTT Period (clock) has started, for example the clock would stop during a period of active monitoring and would start again when the patient is ready to receive treatment.

RTT Details tab - shows activity on the pathway – most recent at the top.
Tick the **Show Intended Activities** box to display future activity. This may be future appointments or Pending elective admissions. They will not have a Status as this is applied when the activity is completed. They are useful to determine what is due to happen next for this patient.

Episodes tab - shows the Outpatient, Waiting List and Admission episodes linked to the pathway. You can right-click on each episode to see more details and if it is an Outpatient referral, the associated appointments

| RTT Details | Pause Periods | Episodes | Comments | Breach Reasons |
